About ISG

First and foremost, ISG is a team. We succeed together and are stronger working in unison. Integrated Solutions Group (ISG) is a regional consulting firm that originated in Olympia, WA, in 1986. We have been providing business and IT solutions to public sector clients within Washington since inception. Our team is comprised of talented professionals bringing a variety of experiences in management & IT consulting services, project strategy & delivery, and public sector domain. It is important that with each addition to our team, you are a fit for your project, your client, and our ISG team. Our culture, while evolving, is focused on supporting our employees, doing the right thing, stewarding diversity, equity, and inclusion (DEI), and ensuring we provide excellence in our client services. ISG is a privately owned, mission-driven organization experiencing high growth and actively seeking professionals excited to help us achieve our goals and vision!

About our Technical Advisory Services (TAS) Team

ISG offers our clients Technical Advisory Services in the areas of enterprise architecture, application & web development, data management, cloud, cybersecurity, ERP, and technical program/project delivery. Our TAS team is known to clients for providing thought leaders and technology experts to help them solve their most complex technology needs.

Role and Responsibilities

The Data Technical Lead will be responsible for providing technical leadership and guidance to ensure the successful Salesforce implementation project. You will lead a team of two individuals responsible for the data migration from legacy source systems. The Data Tech Lead will also document the cross-vendor testing strategy and lead UAT. Work closely with the Engagement Lead/Project Manager to ensure alignment of data and testing deliverables to the overall project objectives. Collaborate with ISG's client, implementation partner, and internal teams to manage SDLC and DevOps processes, ensuring adherence to Agile methodologies and Client policies. This project will implement a modern permit system built on the Salesforce platform extended with Axsy and Docusign Gen and leverage Mulesoft API tools to integrate with GIS mapping and compliance reporting systems.

Key responsibilities include:

Technical Leadership:

- Manage a team of two individuals, including data migration specialists and QA testers, providing guidance, support, and mentorship to drive project success.
- Lead the technical aspects of the Salesforce implementation project, overseeing all data-related activities and ensuring alignment with project goals and timelines.
- Deliverables include data migration plan, schedule and hypercare; data management overview; future state data model and data dictionary; system integration plan; and data verification and testing approach.
- Testing deliverables include UAT test scripts, traceability documentation, UAT and testing debrief facilitation, and defect management reporting.

Client and Partner Collaboration:

- Collaborate with our client, implementation partner, and internal teams to manage SDLC and DevOps processes, ensuring smooth project execution and alignment with Agile methodologies.
- Provide technical guidance and support to stakeholders, addressing any questions or concerns related to data migration, architecture, and compliance with OCIO policies.

Technical Architecture:

- Support the development of general technical architecture and data architecture solutions to meet project requirements, particularly focusing on historical data migration.
- Leverage your expertise in Salesforce, MuleSoft, AWS, SQL, and cybersecurity (NIST) to design robust and scalable solutions that meet the needs of our client and comply with industry standards.

Required Qualifications
- Proven experience leading data migration & testing deliverables for system migrations and implementations.
- Strong experience with Salesforce, MuleSoft, AWS, SQL, and cybersecurity (NIST), with a proven track record of successful implementations.
- Excellent communication and interpersonal skills, with the ability to effectively collaborate with cross-functional teams and stakeholders.
- Effective team leadership skills, removing obstacles, prioritizing work, and aligning deliverables to the overall project goal(s).

Preferred Qualifications
- Familiarity with Washington State Government regulations and standards.

Location

Flexibility is incorporated in ISG's business design. Our teams work from the location of their choice most of the time. There are times that employees will be on site as required by our clients when they are not collaborating and delivering virtually. We do expect our teams will be able to work our client's core business hours of 8am – 5pm PST.

Benefits and Compensation

ISG offers competitive compensation and a comprehensive benefits package including full medical, dental, and vision coverage, family medical leave, expense account, paid holidays, generous paid time off and a 401(k) plan.

The range ISG expects to pay for this position is between $125 - $140 per hour. Where a given candidate falls within that range will depend on a variety of factors, including, but not limited to, the candidate's relevant skills, experience, and location, labor market conditions, and participation, if any, in other compensation arrangements.

How to Apply

Submit your resume to: careers@isg-nw.com.

ISG is an Equal Opportunity Employer

ISG is an equal opportunity employer and is committed to diversity in the workplace. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, or any other characteristic protected by law.

Sample Vaccination Disclosure:

Because ISG works with public agency clients, successful candidates must be able to comply with Governor Inslee's Proclamation 21-14 requiring full vaccination against COVID-19 as a condition of employment. Medical or religious accommodation may be available once an offer of employment is made.
