

Luke Comstock
Senior Security Analyst

Luke has spent the majority of the last 20+ years working at Boeing in a variety of roles, from Systems & Integration Specialist to Network Security Analyst and most recently as a Senior Security Architect. Boeing employees can thank him for the implementation of Boeing's global password management vault and hybrid cloud implementation. He has also led an upgrade and deployment of the Enterprise Security Information and Event Management System (SIEM), and in prior life worked as a Network Administrator at Twin Star, and a Quality Assurance Lead at Intel.

Luke is a results-focused security architect, a talented project team leader, and a relationship builder, who is skilled in translating needs into solutions to improve security postures, architectures, and processes. Some of Luke's core competencies include strategic and secure infrastructure planning, new technology implementation and configurations, threat model design and vulnerability management, development of technology roadmaps, security strategy and plan documentation development, team leadership, development, and mentoring.
