

Stephen Payne
Senior Technical Consultant

Stephen is a senior level ERP systems integration and migration developer with 20+ years' experience solving complex business challenges through evolving and modernizing FinTech solutions for large-scale public, private, and government enterprise organizations. Specializing in Tier One and Mid-Tier solutions, like Workday Financials and Microsoft Dynamics GP, he builds enterprise-level financial integrations with a focus on performance, scalability, and security. He brings full-lifecycle project implementations and hands on experience configuring, developing and testing on modern FinTech platforms. Stephen is focused on delivering code that others can understand, support, maintain, and expand by understanding unique business needs and translating complex technical concepts for a non-technical audience.

A graduate from the University of Washington - Michael G. Foster School of Business, with a Bachelor of Business Administration in Accounting and Computer Science, Stephen is proficient with integrations, integration APIs, integration security, Workday Extend, Workday Studio, Cloud Connect, EIBs, BIRT, Calculated Fields, Report Writer, XML, XSLT, SOAP and Rest APIs. He has software solution integration experience with Workday Financials, Microsoft Dynamics GP, Paymentech, Braintree, ServiceNow, Jira, Salesforce, and Zuora. In addition, he works frequently with the following development tools and languages Microsoft Visual Studio, Microsoft SQL Server, C#, Java, GraphQL, Dell Boomi, AWS SQS & RDS, JSON, and Python.
