![isg Integrated Solutions Group logo]

Jay has over 20 years of experience in technical and management positions within numerous private and public sectors. Providing above rapport solutions in programming, database modelling, design and management, business intelligence, data warehousing and data architecture. He has a passion for building solid data platforms which have high utilization and data efficiency. Working within many platforms to obtain, gather or enhance data into a data backbone any organization needs to thrive. His prior experiences have crossed verticals of healthcare, software, gaming, real estate, banking and more. Companies he's built solid solutions for include Microsoft, T-Mobile, Disney, Colliers, Newell Brands and more. Public sector work includes supporting a data warehouse project with WA Healthcare Authority and a role as a data architect with WA Dept. Retirement Services.

Jay has vast interests in many different things and often helps others with his expertise and knowledge in technology, construction, automotive and aviation. He can be found exploring the countryside along with his wife and kids on all sorts of adventures.

Jay Kinne
Data Architect
